*Software Engineer with 1.5+ years building production-grade web applications, primarily in the **Next.js** and **NestJS** ecosystem but proven across diverse stacks — from Vue.js and Swift to AI integrations.*

EDUCATION

Chulalongkorn University GPAX 3.73

Bachelor of Computer Engineering (1st Class Honours) Aug 2021 - Jun 2025

Relevant Coursework: Data Structure, Algorithm Design, Software Engineering, Database System, Software Architecture

SKILLS

Programming: React, JavaScript, TypeScript, Next.js, NestJS, Vue.js, TailwindCSS, React Native, Swift, Python
Others: AWS, Prisma, PostgreSQL, MongoDB, TanStack Query, Nx, Storybook, Git, Expo
Language: Thai (Native), English (Intermediate)

EXPERIENCE

Top Gun Co., Ltd. Jan 2025 - Present

Software Engineer

- Built web and mobile features in an **Nx** monorepo with **Next.js** and **React Native**/**Expo**, sharing **Zod** contracts.
- Cut dashboard LCP from 8.9s to ~0.9s by moving 11 pages to **TanStack Query** SSR prefetching and hydration.
- Built AI Career Analysis on web and mobile, and an AI job-posting wizard with streamed text and image upload.
- Co-founded the shared **React** UI kit (**shadcn/Radix**, **Tailwind**, **Storybook**) with accessible pickers and drag-and-drop.
- Built **NestJS** services, including a **Puppeteer** image generator and a WordPress replacement on **AWS** via **Terraform**.

OneMore Apr 2026 - Present

Co-founder & CTO

- Architected and built a learning marketplace connecting learners, tutors, and SMEs with **Next.js**, **TypeScript**, and **Supabase** (**PostgreSQL**), covering courses, tutor proposals, and SME project milestones.
- Designed role-based workspaces for students, tutors, businesses, and admins, with server-side data access.
- Set up **Supabase** (auth, storage, row-level security, re-runnable schema) and deployed the SSR app on **AWS Amplify**, with scheduled jobs via **GitHub Actions**.
- Integrated **Stripe** payments (card, PromptPay) with escrow and tutor payouts.

Playtorium Jun 2024 - Jul 2024

Software Developer Intern

- Developed web applications using **Vue.js** and **.NET**, while managing CI/CD pipelines with GitLab.
- Implemented backend transactions and rollbacks, and optimized data management for performance.

Freelance Software Engineer Jan 2023 - Nov 2024

Full-stack Developer

- Built **React Native**/**Expo** apps for property management and real estate with **Socket.IO** chat, plus **Next.js** sites for PromptPay payments and an AI chatbot (**LangChain**), with backend APIs in **Elysia**.

PROJECTS

PharmaCloud *(Contract Project)* Jul 2026 - Present

- Building an AI pharmacy-management platform for a pilot hospital in a 3-person team; leading hospital-system integration (**PostgreSQL**, **HOSos**), and clinical decision-support checks.

BROKE app *(Side Project)*

- Built an iOS expense tracker in **Swift**/**SwiftUI** that turns Thai bank slips into transactions (Slip API + **Gemini** fallback).

KhongKhun TTS *(Capstone Project)*

- Thai–English dubbing system using **LLM** translation and zero-shot **TTS** to preserve the speaker's voice.
- Built the team's internal tools: data validators, demo sites, and a model-weight comparison platform.
